PROFILE

Currently working as a Software Engineer and UI/UX Designer, with a background in Graphic Arts and a degree in Computer Engineering.

EXPERIENCE

Software Engineer & UI/UX Designer

Data Defenders, LLC

Jan 2023 – Present

- Collaborating with cross-functional teams, including developers and product managers, to ensure seamless UI integration with backend systems while aligning with key business objectives.
- Creating comprehensive documentation in Confluence, detailing bug fixes and development strategies, to enhance workflow efficiency and support team collaboration.
- Partnering with QA teams to proactively identify, prioritize, and resolve UI-related issues, leading to a measurable improvement in site performance and stability.
- Redesigning business diagrams to enhance clarity and visual impact in marketing presentations, improving overall communication and engagement.
- Spearheaded the end-to-end redesign of the company's website UI, significantly elevating user experience, visual engagement, and site functionality.
- Developed high-fidelity wireframes, interactive mockups, and prototypes using Figma and Balsamiq, leading comprehensive usability testing that informed iterative improvements based on user insights.
- Contributed to the development of a Software as a Service (SaaS) application using Azure cloud computing, tailored for the Cyber Security industry.

2D Character Illustrator

Freelance Graphic Artist

Apr 2020 – Feb 2023

- Delivered more than 400 commissioned digital illustrations, showcasing exceptional artistic talent and a proven ability to meet a wide range of client expectations.
- Collaborated with local and international clients to fully understand their vision and requirements, consistently ensuring high satisfaction with the final product.
